Accuzyme (Papain and Urea)

??? ??????: 30 ?????2/????? 2017

ACCUZYME (papain and urea) Ointment is generally well-tolerated and non-irritating. A transient "burning" sensation may be experienced by a small percentage of patients upon applying ACCUZYME (papain and urea) Ointment. Occasionally, the profuse exudate from enzymatic digestion may irritate the skin. In such cases, more frequent dressing changes will alleviate discomfort until exudate decreases.
