# Belladonna and Opium (Belladonna and Opium)

??? ??????: 30 ?????2/????? 2017

Belladonna may cause drowsiness, dry mouth, urinary retention, photophobia, rapid pulse, dizziness and blurred vision. Opium usage may result in constipation, nausea or vomiting. Pruritis and urticaria may occasionally occur.

## DRUG ABUSE AND DEPENDENCE

Because of their content of opium, belladonna and opium suppositories are considered as Schedule II drugs by the Drug Enforcement Administration. No data exists on chronic abuse effects or dependence characteristics of belladonna and opium suppositories.
