## Ciclopirox Gel (Loprox Gel)

??? ??????: 30 ?????2/????? 2017

In clinical trials, 140 (39%) of 359 subjects treated with LOPROX® Gel (ciclopirox gel) reported adverse experiences, irrespective of relationship to test materials, which resulted in 8 subjects discontinuing treatment. The most frequent experience reported was skin burning sensation upon application, which occurred in approximately 34% of seborrheic dermatitis patients and 7% of tinea pedis patients. Adverse experiences occurring between 1% to 5% were contact dermatitis and pruritus. Other reactions that occurred in less than 1% included dry skin, acne, rash, alopecia, pain upon application, eye pain, and facial edema.
