## Dehydrated Alcohol (Dehydrated Alcohol Injection)

??? ??????: 30 ?????2/????? 2017

The most commonly encountered side effects are post-injection neuritis with persistent pain, hyperesthesia and paresthesia. Subarachnoid neurolysis and lumbar sympathetic block may be followed by motor paralysis, bladder or rectal incontinence and impotence. Severe hypotension may follow celiac ganglion injection. Corneal anesthesia, meningitis or cranial nerve palsy may follow injection of the gasserian ganglion.

### Drug Abuse And Dependence

None known with this size and manner of presentation.
