## Digibind (Digoxin Immune Fab)

??? ??????: 30 ?????2/????? 2017

Allergic reactions to DIGIBIND (digoxin immune fab) have been reported rarely. Patients with a history of allergy, especially to antibiotics, appear to be at particular risk (see **WARNINGS**). In a few instances, low cardiac output states and congestive heart failure could have been exacerbated by withdrawal of the inotropic effects of digoxin. Patients with atrial fibrillation may develop a rapid **Laboratory Tests** of digitalis. Hypokalemia may occur from re-activation of (sodium, potassium) ATPase (see **Warnings**).  
<sup>4</sup> ventricular response from withdrawal of the effects of digitalis on the atrioventricular node.
